

28th European Colloquium on Heterocyclic Chemistry (EHC2018)

The 28th European Colloquium on Heterocyclic Chemistry will take place in Lecce (Italy) from September 2 to 5, 2018.

The EHC is an open meeting dealing with all aspects of heterocyclic chemistry with speakers from several European countries and participants from academia and industry. The EHC meeting aims at presenting innovative results and promoting scientific interactions.

The 3 following topics will be covered:

- Heterocyclic Synthetic Methodology
- Heterocycles properties in biological systems
- Enabling Technologies

Since the foundation in 1962, EHC have been organised all over Europe and the EHC series have grown to be major events in the field with world class speakers.

The scientific program will include 11 plenary lectures, 11 invited lectures and many short oral communications selected from submitted abstracts, as well as poster communications.
