

6th qNMR Summit 2024

[qNMRsummit2024_big.PNG](#) [1]

The 6th qNMR Summit in Europe is planned for September 18-20, 2024 as an in-person meeting. These events have been held worldwide since 2016 and have gone from strength to strength.

The objective is for the Symposium to help scientists adopt NMR for wide-ranging topics relating to quantitation and mixtures analysis. The correct use of qNMR and emerging technologies are the focus of presentations. Early career scientists are encouraged to attend, and will benefit from contact with users from industry and academia. qNMR is widely adopted in many industries – from pharmaceuticals to food – and this is broadly reflected in the presentations. Every effort is made for the meeting to be friendly and supportive, and ample time is allocated to personal interactions.

We encourage you to attend the Conference and present your work and interests. We will accept oral- and poster presentations. We will also welcome your suggestions for other speakers and topics.
