

Summer School on Pharmaceutical Analysis 2023 (SSPA2023)

The SSPA is an international School which is addressed to PhD students, young researchers and professionals from private companies. The 2023 edition will focus on "Analytical methods for drug manufacturing and quality control". Lectures will be delivered by recognized experts from the industrial and academic sectors. The 2023 edition will be organized as hybrid event, hence participants can choose to attend the event in presence or from remote.

PhD students at the end of their PhD program have also the chance to apply for a 20-min oral presentation. The official language of the School is English.
